SECTION 4: FIRST	AID MEASURE	s		
EYE: H314		Causes eye damage. IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Immediately call a POISON CENTER or doctor/physician.		
SKIN:	H314	Causes severe skin burns. IF ON SKIN (or hair): Remove/take off immediately all contaminated clothing. Rinse SKIN with water/shower. Wash with plenty of soap and water. Wash contaminated clothing before reuse.		
INHALATION:	H333	May be harmful if inhaled. IF INHALED: Remove victim to fresh air and Keep at rest in a position comfortable for breathing. Call a POISON CENTER or doctor/physician if you feel unwell.		
INGESTION:	H302	Harmful if swallowed. IF SWALLOWED: Rinse mouth. Do not induce vomiting. Call a POISON CENTER or doctor/physician IF you feel unwell.		
NOTES TO PHYSIC	CIAN:	Symptomatic and supportive therapy as needed. Following severe exposure, medical follow-up should be monitored for 48 hours.		
SECTION 5: FIRE F	IGHTING MEAS	URES		
FLASH POINT:		Not available.		
HAZARDS WHEN NEAR FLAME:	ON FIRE OR	May produce toxic fumes of carbon dioxide, carbon monoxide, and/or nitrogen oxides when near heat source/flame. When in a closed container, pressure will increase which may lead to a rupture of the container.		
SUITABLE EXTING MEDIA:	GUISHING	Dry chemical foam, carbon dioxide, foam, or water spray (mist/fog) to extinguish.		
UNSUITABLE EXT MEDIA:	INGUISHING	None known.		
SPECIAL EXPOSU	RE HAZARDS:	Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. If in a fire or heated, a pressure increase will occur and the container may rupture.		
SPECIAL PROTEC EQUIPMENT FOR FIGHTERS:		Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode. PVC boots, gloves, safety helmet and protective clothing should be worn.		
SECTION 6: ACCID	DENTAL RELEAS	E MEASURES		
ACCIDENTAL RELI MEASURES:	EASE	For major spills call CHEMTREC: Toll free 1-800-424-9300 for international call 1-703-527-3887.		
PERSONAL PRECAUTIONS:		Wear appropriate personal protective equipment recommended in SECTION 8: EXPOSURE CONTROL/PERSONAL PROTECTION of this SDS. Immediately contact emergency personnel. Evacuate the area. Keep upwind avoiding inhalation of vapors. Clean-up should only be performed by trained personnel. People dealing with major spillages should wear full protective clothing including respiratory protection.		
ENVIRONMENTAL PRECAUTIONS:		This material may contaminate the environment without proper control and response to spills. Ensure spilled material does not come in contact with soil, waterway, drains, sewers, or other runoff that would further disperse the material. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil, o air). Sources of ignition should be kept clear.		
METHODS FOR CO	ONTAINMENT:	Use diking or capping to control migration. Contain and absorb large spillages with a non-flammable absorbent carrier (such as vermiculite, earth, or sand). DO NOT USE combustible materials such as sawdust. Shovel into open-top drums or plastic bags for further decontamination, if necessary. Remove and properly dispose of residues. Dispose of via a licensed waste disposal contractor (See SECTION 13: DISPOSAL CONSIDERATIONS) Notify applicable government authorities if release is reportable.		

METHODS FOR CLEANING UP:	Only proceed with clean up by taking the appropriate personal protection measures required and ensure surrounding area does not contain further hazards that could worsen the spill, cause migration, or cause further harm (i.e. eliminate any ignition sources). Move any non-contaminated, non-leaking containers from the spill zone if it can be done safely. Dike, dam, or further restrict and stop active leaks without posing further damage or harm to individuals, the environment, and/or structures. Contain and collect spillage. See SECTION 13: DISPOSAL CONSIDERATIONS for disposal information and SECTION 8: EXPOSURE CONTROL/ PERSONAL PROTECTION for recommended Personal Protective Equipment (PPE). Obey all local, state, and federal regulations during clean up.
SECTION 7: HANDLING & STOR	
GENERAL:	Ideal storage temperature is 60-90°F (15-32°C). Handling and storage shall be in accordance with local, state/provincial, or federal regulations.
HANDLING:	Before opening this package, read and follow warning labels on all components. Avoid contact with the product or reaction mixture. Put on appropriate personal protective equipment. Use only with adequate ventilation to ensure that the occupational exposure limit is not exceeded, use respirator when ventilation is inadequate. Avoid breathing aerosols, mists, and vapors. (See SECTION 8: EXPOSURE CONTROL/ PERSONAL PROTECTION for details). Do not ingest. Eating, drinking, and smoking shall be prohibited in areas where this material is handled, stored, and processed. Workers shall wash hands and face before eating, drinking, and smoking. Persons with a history of skin sensitization problems, asthma, allergies, or chronic or recurrent respiratory disease should not be employed in any process in which this product is used. Do not get in eyes, on skin, or clothing. Keep in the original container or an approved alternative made from a compatible material. Kept tightly closed when not in use. Empty containers retain product residue and can be hazardous. Do not reuse containers.
STORAGE:	Keep container tightly closed and properly sealed when stored. When possible, store product indoors in a dry, well-ventilated area. Store in original container protected from direct sunlight, away from incompatible materials, and away from food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers and use appropriate containment to avoid environmental contamination.
SECTION 8: EXPOSURE CONTR	ROLS/PERSONAL PROTECTION
EXPOSURE LIMITS:	As of the latest revision of this document, no known exposure limits exist for this prod- uct. The absence of current exposure data does not relieve an employer, user, or other to determine the specific hazards and appropriate exposure protection measures in the application and use of this product. Personal, workplace, atmospheric, and/or biological monitoring may be required to determine the effectiveness of engineering, administra- tive, and/or other best practice control measures. These monitoring results determine the need for and type of respiratory protective equipment, if any. Refer to the appropri- ate local, state, and federal regulations and statutes for the most current information and for guidance in the determination of hazardous conditions and the correlating personal protective equipment.
ENGINEERING CONTROLS:	Use only with adequate ventilation. If user operations generate dust, fumes, gas, vapor, or mist, use process enclosures, local exhaust ventilation, and other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits.
HYGIENE MEASURES:	Wash hands, forearms, and face thoroughly with plenty of soap and water after handling chemical products, before eating, smoking, and using the restroom and at the end of the working period. Appropriate engineering, administrative, and other best practice decontamination control measures must be used to isolate contaminates on clothing and to prevent unintended migration of contaminants. Handle clothing and other potentially contaminated material appropriately and in compliance with local, state, and federal regulations in the process of removing, washing/cleaning, and reuse of these potentially contaminated materials. Ensure compliant use and location of eyewash station and safety showers.

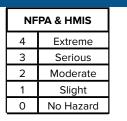

PERSONAL PROTECTIVE E	QUIPMENT (PPE):					
EYE PROTECTION:	Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: chemical splash goggles and/or face shield.					
SKIN PROTECTION:		Personal protective equipment for the body should be selected based on the task being performed, the risks involved, and should be approved by an industrial hygiene specialist before handling this product.				
HANDS PROTECTION:	Chemical resistant gloves complying with applicable health and safety standards shall be worn when handling this product. Protective gloves are those made from butyl rubber, nitrile rubber, or polyvinyl alcohol. Appropriate hazard assessments in conjunction with an evaluation of the protection factors of chemical resistant gloves shall be performed to ensure the protective properties remain intact. It is noted that the time to breakdown of protection factors for different gloves may be impacted and deteriorate at unpredictable rates without understanding the impact of the substance and the specific protection factors of the chemical resistant gloves.					
RESPIRATORY PROTEC- TION:	Ensure adequate ventilation. Where risk assessment shows air-purifying respirators are appropriate use a full-face particle respirator type N100 (US) or type P3 (EN 143) respirator cartridges as a backup to engineering controls. If the respirator is the sole means of protection, use a full-face supplied respirator. Use respirators and components tested and approved under appropriate government standards such as NIOSH (US) or CEN (EU).					
ENVIRONMENTAL EXPOSURE CONTROLS:	Dispose of raw and spent materials and wastes in compliance with all local, state, and federal regulations to prevent potential environmental contamination. Industrial air monitoring may be required to determine any potential environmental hazards to the atmosphere. This monitoring may result in the use of engineering and administrative controls such as filtering and scrubbing systems to mitigate or eliminate potential contaminants.					
SECTION 9: PHYSICAL & C	HEMICAL PROPERTIES					
PHYSICAL STATE:	Liquid	FLASH POINT:	Not available			
COLOR:	Clear	AUTO-IGNITION TEMPERATURE:	Not available			
ODOR:	Amine odor	DECOMPOSITION TEMPERATURE:	Not available			
ODOR THRESHOLD:	Not available	EXPLOSIVE LIMITS:	Not explosive			
pH:	Not applicable	FLAMMABILITY:	Not available			
WATER SOLUBILITY:	Not available	BOILING POINT:	Not available			
PARTITION COEFFICIENT:	Not available	BOILING RANGE:	Not available			
SPECIFIC GRAVITY:	1.00±0.005 g/cc @ 77°F (25°C)	MELTING/FREEZING POINT:	Not available			
VISCOSITY:	375±50 cps @ 77°F (25°C) VAPOR PRESSURE: Not available		Not available			
EVAPORATION RATE:	Not availableVAPOR DENSITY:Not available		Not available			
VOC:	Not available	RELATIVE DENSITY:	8.35±0.05 lbs/gal			
SECTION 10: STABILITY & REACTIVITY						
STABILITY:	Stable when handled and stored at temperatures 60-90°F (15-32°C).					
INCOMPATIBILITY:	Strong reaction with acids and oxidizing agents.					
HAZARDOUS REACTION:	No specific data available.					
HAZARDOUS POLYMERIZATION:	Hazardous polymerization will not occur under normal conditions of storage and use.					
CONDITIONS TO AVOID:	Avoid temperatures above 100°F (38°C) and freezing temperatures. Avoid moisture contamination in containers.					
HAZARDOUS DECOMPOSITION:	Combustion of product will lead oxides of nitrogen, carbon dioxide, and carbon monoxide being produced.					

SECTION 11: TOXICOLOGY INFOR	RMATION					
ACUTE HEALTH EFFECTS:						
EYE CONTACT:	Causes eye damage.					
SKIN CONTACT:	Causes severe s	kin burns.				
INHALATION:	May be harmful i	f inhaled.				
INGESTION:	Harmful if swallo	wed.				
ACUTE TOXICITY:						
COMPONENT NAME	CAS NUMBER	LD ₅₀ Oral (mg/kg)	LD ₅₀ Dermal (mg/kg)	LC ₅₀ Inhalation (mg/m³/4hrs)		
Polyoxypropylenediamine	9046-10-0	480 (rat)	2,090 (rabbit)	Not available		
Glyceryl poly (oxypropylene) triamine	64852-22-8	2,690 (rat)	12,500(rabbit)	Not available		
Diethylmethylbenzenediamine	68479-98-1	738 (rat)	>2,000 (rabbit)	Not available		
POTENTIAL CHRONIC EFFECTS:	<u>!</u>	•				
CHRONIC EFFECTS:	pancreas, liver, th	hyroid, and eyes. An	increase in the numbe	mine caused effects in the er of tumors in the liver and glands of female rats was		
TARGET ORGANS:	Pancreas, liver, thyroid, and eyes.					
CARCINOGENICITY:	As of this publication, this material is not listed on the National Toxic Program (NTP) Report of Carcinogens. Please refer to the most recent information with NTP.					
MUTAGENICITY:	No known significant effects or critical hazards.					
TERATOGENICITY:	No known significant effects or critical hazards.					
FERTILITY EFFECTS:	No known significant effects or critical hazards.					
DEVELOPMENTAL EFFECTS:	No known significant effects or critical hazards.					
MEDICAL CONDITIONS AGGRAVATED BY OVER-EXPOSURE:	Existing respiratory/pulmonary and skin conditions may be aggravated by overexposure.					
SECTION 12: ECOLOGICAL INFO	RMATION					
ENVIRONMENTAL EFFECTS:	Based on a review of the individual components, this product may be immediately harmful to aquatic organisms, may cause long-term adverse effects in the aquatic environment, and not readily biodegradable.					
SECTION 13: DISPOSAL CONSIDERATION						
WASTE DISPOSAL:	By-product wastes or process waste generation should be eliminated and/or minimized when possible. Do not dispose of any contaminants into sanitary sewer systems, storm drains, Publicly Owned Treatment Works (POTW), or any other municipal waste water treatment facility without written approval and agreements for processing wastes with such enterprises. Dispose of raw or unused materials, wastes, and/or by-products in accordance with all applicable local, state, and federal laws. Employ the expertise and knowledge of qualified personnel or contractors in disposal of any and all variants of this product. Ensure material containers are cleaned to the applicable standards before recycling, disposing, or reusing containers. Take special precautions to avoid any cross contamination and potential unknown effects from mixing with other substances. Refer to SECTION 8: EXPOSURE CONTROL/ PERSONAL PROTECTION of this document for personal protection requirements. Disposal to the environment or in violation of environmental protection laws and statutes must be prevented.
